

# What's the difference between good and great signaling solutions?

Let us show you 100 great examples.

You can benefit from the fact that Tieto has been in the telecom business since the early 1990's and has been the partner of choice for leading NEPs and System Integrators. Our reputation of delivering a robust and recognized portfolio of signaling products and services works to your advantage. We have installations in over 100 networks for all major operators to prove it.

Knowledge. Passion. Results.

# Make it work in a changing industry

## With Signaling Solutions from Tieto

Tieto Signaling Solutions has an established portfolio of signaling products and services that are used throughout the world. Our broad range of high-quality signaling products are matched with our extensive signaling service offering to ensure your network connectivity.

You probably have heard it before: converged networks are changing the IT and telecom industry. The key to success is to embrace these changes and turn them into opportunities. Network equipment providers, telecom operators, software suppliers, system integrators, and application developers are facing the same challenge – how to bridge different technologies, combine new and mature services, and connect previously separate industries.

In a business world where the stakes are constantly changing, make sure you team up with partners that thrive on change.

Tieto Signaling Solutions offers a complete portfolio of signaling products and services that are designed to secure your network connectivity needs for today and into the future; we also ensure a secure migration path along the way.

### Signaling Stacks

Tieto offers robust and scalable signaling solutions that interconnect the existing and next generation network technologies. Signaling stacks are well documented and well supported on a global basis and meet the global standards of the very largest NEPs and operators.

### Application Enablers

Reduce your time to market, development costs and application complexity with Tieto's high-level application functionality on top of the Tieto signaling solution.

### Gateways

Benefit from a family of cost-effective signaling gateway products and connectivity solutions that enable interworking between different types of networks and nodes that shorten your time to market.

### Unified Communication and collaboration

Signaling products, professional services and UCC cloud service bridge the existing and next generation network technologies and enable interconnectivity between the public telecom networks and multiple vendor-specific UCC solutions.

### Tieto Signaling Professional Services

Take advantage of our solid know-how and in-depth understanding of the telecom industry. Rely on us to solve whatever connectivity problem you might have.

#### Why Tieto

Tieto is the leading IT service company in Northern Europe providing IT and product engineering services. Our highly specialized IT solutions and services, complemented by a strong technology platform, create tangible business benefits for our local and global customers. As a trusted transformation partner, we are close to our customers and understand their unique needs. With about 18 000 experts, we aim to become a leading service integrator and create the best service experience in IT.

Together with our customers, we have achieved installations in more than 100 networks for all major operators and over 25 000 nodes installed worldwide. We are the partner of choice for leading Operators, NEPs and System Integrators. The key to our success is knowing our customers and the telecom business inside out.

### Team up with a partner that thrives on change!
